**Presentation**

**Topic:** We're almost 3 years into the COVID pandemic. There are signs that we will be dealing with not only COVID but RSV and the flu this winter. Now that telehealth has become an acceptable part of SOTPs providing services, WATSA wants to discuss when people are providing in-person services vs. offering telehealth. Are there differences between how you conduct evaluations compared to providing treatment?

What is working, what continues to be a struggle?

**Facilitator:** Dan Knoepfler, LMHC, CSOTP
