Jesemia Klein	Richard Packard

Presentation

Title: Psychopathy

- Overview:**
1. What is psychopathy? The biological, interpersonal, and (anti)social characteristics. Is it a continuous set of features or a discrete condition?
 2. How is psychopathy measured? This will include a discussion of the PCL-R as well as the youth version, and other measures, too. Additionally, the advantages and disadvantages of each. What is meant by PCL Factors and Facets?
 3. Implications of the measures.
 4. Can it be mitigated/treated? What does the treatment literature tell us?

Facilitator: Dr. Richard Packard is a Licensed Psychologist and Certified Sex Offender Treatment Provider. He has over 30 years of experience in the field. He is a past-president of WATSA.

(WATSA members receive 2 hours of continuing education credits for attending today's presentation; please retain a copy of these minutes as a record/proof of your attendance/CEUs).
